

STEVI-POS®

ALWAYS IN THE RIGHT POSITION

New from ARI!

STEVI-POS® – The digital electropneumatic positioner

STEVI-POS®

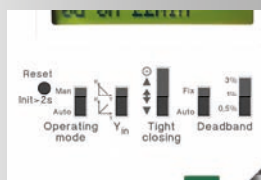

STEVI-POS®, the new digital electropneumatic positioner – developed and manufactured in Germany – ensures the highest quality standards and is hence a reliable positioner whatever your application. Our customers can now also profit from a one-stop shop for pneumatic control valves – made by ARI!

- Compact design
- Quick initialisation and easy operation
- Contactless Hall sensor for position determination means the positioner is durable, vibration-resistant and wear-free

- Proven piezo technology enables low air consumption, leading to higher efficiency as well as substantial savings
 - Captive hood screws
 - Simple diagnostics
- Optional accessories**
- Pressure gauge block for indicating actuating pressure
 - 4-20 mA feedback via an analogue output card

Reliable in operation and inexpensive to maintain due to the proven, economical piezo technology

Rapid start-up and easy operation due to the combination of selector switches and software menus

Fast access to diagnostic data such as temperature violations

Contactless and precise stroke determination with the Hall sensor enables wear-free use even in harsh conditions

For more information on the STEVI-POS® as well as commissioning and mounting, see our YouTube playlist.
